## Mayor Burns Is Re-Elected for the Fifth Term

Two Former Councillors Re-Elected by Acclamation—Peter Smith New Face on Council

Nominations for the vacancies on the council and the school trustee board did not produce any excitement between 11 and 12 o'clock on Monday morning, only those interested in the nomination of the candidates being present, and for the council the candidates for mayor and the three vacancies as councillors will be filled by acclamation. Mayor Burns is returned for the mayoralty for the fifth term, and Councillors Geo. Patterson and J. F. Moores are again returned as councillors, while new blood will be injected into the corporate body of the town by the election of Peter Smith, who takes the place of Councillor Sam Moores, who decided not to stand for re-election this year in order to devote his entire time to his own business affairs.

The new councillor is making his initial bow to the public as an aspirant for municipal honors, and was nominated by Walter Nelson and J. S. Rogers. He has been a resident of the town for many years, and is employed at the McMillivray mine. He is well known as the secretary of the Coleman branch of the Canadian Legion, in the carrying on of which he has always taken a keen interest.

Contrary to rumors prior to nomination day, there was no opposition to the election of Mayor Burns. He has served either as councillor or mayor the longest of any man on the board, and apparently the ratepayers were quite willing that he should continue as the administrative head of the town's affairs. Following the close of nominations he was congratulated by his supporters on his re-election.

For the vacancies on the school board there will be an election, four candidates offering themselves for two vacancies. Robert Evans, Herbert Snowden and Wm. Graham are the three new candidates, while the former chairman, Mr. Thomas Johnson, is again a candidate.

Mr. Johnson has taken a deep interest in the administration of the schools, and for two years has been chairman of the board, giving considerable time to the work. As he is well versed in the detail work of the board, and school matters having been running smoothly during his regime, he has many supporters among the ratepayers who would like to see him returned for another term.

The other three candidates are residents of many years standing, Mr. Evans being employed as hoist engineer at the McMillivray mine; Mr. Snowden being engaged in the insurance business, and Mr. Graham, who is a past president of the Canadian Legion, is manager of the Legion club, and formerly was employed at the McMillivray mine, prior to going overseas, and also for a time following the war.

The complete list of nominations is as follows:

### For Mayor

W. J. Burns, nominated by J. S. Rogers and Walter Nelson.

### For Councillors

Geo. Patterson, nominated by Alex. J. Morrison and H. C. McBurney.

Peter Smith, nominated by Walter Nelson and J. S. Rogers.

J. F. Moores, nominated by W. J. Burns and Walter Nelson.

### After the Ball Was Over

A wedding party in East Coleman had its sequel in the police court on Tuesday, when two men were charged with assaulting two others of the party, in which a knife was used. The case was heard before Magistrate Gresham, in the council chamber yesterday, J. E. Gillis appearing for the prosecution and S.G. Banan for the defense. As the evidence and cross examination had to be conducted through interpreters, the proceedings were lengthy and tiresome. The victim of the affray was in court with his head plastered with heavy strapings of adhesive tape.

### "She's a Wonder" is the New Ford Car

First New Model in Coleman Creates Keen Interest—Makes Strong Appeal

The new Ford model was seen for the first time in Coleman on Saturday last, when Mr. Willett of the Ford Motors, Calgary, arrived with the Ford coupe which has been used for exhibition and demonstration purposes in the cities of the province. Naturally it excited a great deal of curiosity, and even before the garage men had time to get it cleaned up and looking its very best, people were flocking into the garage to "look her over." It decidedly improved in appearance over the old models, it has the appearance of a much better finished car, while even stronger in contrast in its performance.

The old familiar sound of the "Lizzie" is not emitted as it gathers speed and to those whose ears are attuned to detecting various cars by the sound of the engine or the exhaust, the new Ford has in addition to its other many new features a new and less pronounced sound.

Mr. Morrison the local dealer, has already received a number of orders, and states that a trial demonstration will be gladly given to any person interested, which will convince a prospective car buyer of the many up to date features in the new Ford. It would also be advisable to get orders in early, as the way in which orders are being placed throughout Canada indicates that even the high producing capacity of the Ford factories will be taxed to the limit to keep pace with the demand.

### Warm Contest Contemplated at Blairmore

With three councillors to be elected the following list of citizens were named insuring a merry fight: Arthur Ferguson, W. H. Beebe, Evan Morris, Ole M. Olsen, Enrico J. Pozzi, Samuel H. Turner and William Patterson. For the school board William A. Beebe, Harold Pinkey, John Irvine and Duncan C. Dain were nominated, two to be elected.

### For School Trustees

Robert Evans, nominated by J. Morris and Walter Nelson.

Herbert Snowden, nominated by Walter Nelson and J. M. Allen.

Thos. Johnson, nominated by R. M. Greenhalgh and G. S. Greenhalgh.

Wm. Graham, nominated by Walter Nelson and Peter Smith.

Yesterday morning the nomination of Wm. Graham for school trustee was withdrawn, he having decided not to contest the election.

I was troubled with defective eyesight, consult G.R. Powell, registered optometrist, Coleman.

### Hospital Board Extends Privileges

Residents Other Than Miners May Now Avail Themselves of Special Rates

The Miners Hospital Board desire to inform all residents of Coleman, whether married or single, that they are prepared to accept them as patients in the hospital under the following conditions: The Hospital Board shall supply hospital accommodation and nursing to residents including their families in the town of Coleman for the sum of \$1.50 per month, payable three months in advance, to the secretary or matron of the hospital, excepting infectious or contagious diseases, which shall not be admitted to the hospital.

WM. FRASER,  
Sec. Hospital Board

This decision was reached by the Board through the many requests that have been made by residents other than those entitled to admission through working in or around the mines, and by granting this concession the Hospital Board are placing within the reach of all hospital service which in many cases in the past proved a financial worry to those requiring it.

### Wearing Stolen Clothes When Arrested

Youths Sentenced to Jail For Burglarizing Coleman Store

Convicted of breaking and entering the store of Charles Nicholas, and stealing the sum of \$10 in cash and clothing of the approximate value of \$160, Albert Langhorne, Charles Wiles and Jos. Degennegane were sentenced to jail by Judge Mac Donald at Blairmore on Friday afternoon.

Albert had already received a number of orders, and states that a trial demonstration will be gladly given to any person interested, which will convince a prospective car buyer of the many up to date features in the new Ford. It would also be advisable to get orders in early, as the way in which orders are being placed throughout Canada indicates that even the high producing capacity of the Ford factories will be taxed to the limit to keep pace with the demand.

When arrested by Constable Hammond of the A.P.P., the accused were wearing new clothes taken from the store. Entrance was effected into the store by cutting a strip out of the basement door with a penknife and then pulling off a board of the door, which enabled the parties to release the three bars securing it.

### Attends Convention

BLAIRMORE.—W.H. Chappell, Jr., chairman of the Blairmore school board, left on Monday night for Edmonton where he will attend the convention of the school trustees of the Province, which is being held in the Capital city this week. Mr. Chappell will not be the only representative of the Pass trustees at the convention, since he is being accompanied by Mr. Bradley of the Bellevue school board.

### Entertainment

Members and friends of the United church as well as the general public are asked to watch for the announcement of a program to be given in the church on Monday evening.

Detailed programs are not quite complete but if the arrangements carry on, evening quite out of the ordinary is promised. Please watch for further and fuller announcements.

### Earl Haig Memorial Service on Sunday

Canadian Legion Invite Public to Attend Service at 3:00 in Palace Theatre

Order of Memorial Service at the Palace Theatre, Coleman, on Sunday, February 12th, at 3:00 p.m.

Major W. J. Burns, Presiding Opening Hymn Led by the Band Opening Prayer Capt. Hind, S.A. Hymn

Obituary Address Rev. H. D. Bevan Soprano Solo Mrs. Asbridge Closing Prayer and Benediction Rev. Fr McCormick ("The Last Post") Trumpeter J. Low The National Anthem

Officers of the Canadian Legion, Coleman Branch, will occupy seats on the stage, as follows: President, J. Hadley; Vice President, J. Holley; Secretary, Peter Smith.

Returned men will occupy the front seats of the theatre.

A silver collection will be taken at the door and proceeds devoted towards the War Memorial Fund.

Bard under the leadership of Mr. A. Morris.

### New Telephone Building for Blairmore

The Blairmore correspondent of the Calgary Albertan states that Blairmore is to have a very attractive, new, fully modern building for a telephone exchange in the near future to replace the old office which was destroyed by fire shortly after Christmas. The Alberta Government Telephone Department has called for tenders for the new structure and the plans have just been received by Sam McDowell, local manager. The new building will be erected in bungalow style slightly to the east of the ruins of the old building, and will have a frontage of 34 feet on Victoria street, with a depth of 22 feet. The outside is to be brick veneer of No. 1 rough tap entry Medicine Hat or Redcliff brick, and the frontage as shown by the plan is quite artistic, and will be a pleasing addition to Blairmore's main street.

The interior will provide space for an operating room with inside counter 9 ft. 6 in. by 21 ft; public space 9 ft. 6 in. by 11 ft.; a manager's room 11 ft. 6 in., a booth and a large rack and battery room. Oak doors and inside finishing are called for, and the roof is to be of asphalt shingles.

### Young Orators Preparing for Contest

Keen interest is being taken by High School students throughout the province in the national oratorical contest being sponsored by the Calgary Herald and the Edmonton Journal. Schools are arranging their elimination contests, the winners of which will meet in district contests, and the victors in these, in turn, will hold their competitions at Calgary and Edmonton to decide the Alberta champions, the winner in the final event between these two contestants to compete with representatives of the other provinces of the Dominion for the Canadian championship. Handsome prizes are to be awarded the winners in the various stages of the contest. The subject chosen for the speeches is "Canada's Future."

Sunny Southern Alberta lived up to its reputation this week, for the bright sunshine and exhilarating air gives every indication of the advent of spring.

Coleman, Feb 7th, 1928.

I heartily thank the Electors of Coleman for the confidence they have placed in me in allowing me by acclamation to represent them as their Mayor for another two years. As in the past I will faithfully and to the best of my ability discharge my duties to the very best interests of the people of Coleman.

W. J. BURNS,  
Mayor

### Schools Show Increased Attendance

Further Accommodation Secured to Provide for Greater Number of Pupils

A brief review of the affairs of Coleman school district for the year 1927 will prove of interest.

During the year 658 pupils were registered, of whom 81 were in the high school. An additional teacher was added to the high school staff at the opening of the fall term. The staff now consists of three high school teachers, including Principal Hoyle, ten public school grade teachers at Central school, and four at Cameron school. The actual operating expenses for the year amounted to \$31,315.69, or \$47.57 per pupil.

Cash on hand on January 1, 1927 amounted to \$16,057.24. Current taxes collected were \$29,129.98, plus arrears collected of \$8,376.19; the government grant of \$3,263.55 and "study" receipts amounting to \$1,859.37 bring the total cash receipts to \$58,786.33.

Expenditures include \$22,372 for teacher's salaries; \$1,261.80 to officials; notes and interest \$2,025; building, repairs, furniture, grounds etc., \$5,695.11; supplies \$11,135.24; caretaking \$3,865; fuel, water, sundries, \$1,427.70; insurance \$585; loan to town of Coleman \$1,807.50; a total of \$40,174.36. This leaves a balance of \$18,411.98, an increase over last year of \$2,564.74. This is due to increased assessment owing to the inclusion in the district of the power plant at Crow's Nest Lake. Total assessment was \$1,705,949.90; farm lands \$28,547; rate of taxation, general 22 mills, farm lands 10 miles. Notes outstanding amount to \$6,000.

In order to provide further necessary accommodation, the board has purchased the building and site at present occupied by the Canadian Bank of Commerce for \$3,000, the payment to extend over a period of three years, with interest at five per cent.

### Notes by the Way

"Twas Ever Thus—a blockhead can find more faults than a wise man can merit. —Old Proverb.

Happiness can be attained by always looking on the bright side instead of filling the mind with vague imaginings of fancied wrongs.

Winter is not finished yet, but the warm spell of last week helped to shorten it considerably.

The man who never makes mistakes is altogether likely to be the kind of a man who never starts anything.

The power of the printed word is far-reaching—for that reason every care should be exercised to see that only what is true is printed.

Success in any enterprise was never achieved by leaning or relying on somebody else. It comes by effort of will to make desires become realities.

Will Graham, the genial and courteous steward at the Canadian Legion club, has tendered his resignation, and will resume work in the mines. "Bill" went overseas from Coleman in the early part of the war, and returning to Coleman, went to work at his old job, but sickness compelled him to relinquish heavy work for awhile.

In clean, bright Aluminum

### Canada To The Fore

Canada's amazing progress in the last few years is challenging the attention of the world. That progress is based not only on the great variety, extent and richness of this country's natural resources, but is founded in the renewed faith of Canadians in their Dominion and in the confidence they have in themselves, a faith and confidence born largely of the really tremendous achievements of Canada during the years of the Great War. In that titanic struggle the people of Canada showed wonderful energy, displayed great initiative, unsurpassed organizing ability, and hitherto undreamed of powers and strength. Thrown to a large extent upon its own resources, financial and otherwise, the Dominion courageously faced all problems and did so with marked success.

For example, if any weathered the stormy days and difficult conditions of the after-the-war reconstruction years as successfully as did this Dominion, Canadians became conscious for the first time of their national strength; the people discovered their national soul. Their former doubts and timilities, their self-distrust, and what has commonly been termed their inferiority complex, disappeared, and has been replaced by courage, confidence and marked success.

In former years it is true, Canadians had successfully grappled with large and difficult domestic problems, but, in these more recent years, the Dominion has boldly taken its place in the world arena. Its position today in the Councils of the League of Nations is an outstanding one, its place in the Commonwealth of British Nations is strong and envied. The score or more new countries in the Americas, United States included, the United States and the dominions of Central and South America, are anxious that the Dominion should join them and give added strength and prestige to the Union, while other nations are encouraging the establishment of direct diplomatic representation with this country.

But even yet, it is doubtful if many Canadians fully realize the rapid growth and steadily increasing power of their own country, as well as a rule, the average citizen pays little attention to so-called dry statistics in which the growth of a country is set forth. In a recent speech at Winnipeg, Mr. E. W. Beatty, president of the C.P.R., succinctly and impressively set forth a few facts, which will bear repeating. He noted, for example, the following:

Every working day last year Canadians took from their forests, products valued at \$1,500,000.

From the land took \$250,000 daily.

Every working day increased their capacity for manufacturing pulp and paper by 1,000 tons. Canada now manufactures one-third of the world's requirements of newsprint.

Every working day they added 700 horsepower in hydro-electric energy to the power already installed, and at the same time began work that will add 1,000 h.p. every day in the first six months of 1928.

Canada's export trade last year, with less than 10,000,000 people, was equal to the export trade of the United States, when the latter country had a population of 75,000,000.

Commenting on these and other statements in Mr. Beatty's striking survey, a Winnipeg paper asks: "Is it any wonder that in the past two years the Canadian people have been putting \$200,000,000 in the savings banks every business day?" The same paper quotes a financial institution correspondingly: "Buying life insurance at the same relative rate, buying back millions in securities formerly held in Great Britain and Europe, providing almost unlimited capital for sound industrial enterprises, and have acquired a spirit of solid confidence and self-reliance?"

Nor is it surprising that more people are emigrating from the British Isles to Canada than to any other country, many thousands more than to Australia.

Speaking at the opening of the great 5,500,000 bushel terminal elevator just completed by the United Grain Growers at Port Arthur, President T. A. Crerar predicted that, while Canada was now producing approximately 500,000,000 bushels of wheat annually, and is today the world's greatest wheat exporting country, production would be further increased until this Dominion would be producing one billion bushels of wheat annually.

And the thought for Canadians to keep ever in their minds, and to profit by, is that Canada is only just beginning to get into its stride.

### Suggests Cure For Criminals

Physical World Combat Crime By Use Of X-Ray

A sentence of "under the 'ray'" instead of the gallows or a drab jail would be meted out to criminals if a group of Wheeling physicians made practical their theory of combating crime through the medium of the X-ray.

After studying the facts of Nathan Leopold, Richard Loeb and others, Dr. Hersey said he found in all of them tell-tale characteristics of gland cases.

Only the uninformed endure the agony of corns. The knowing ones apply Holloway's Corn Remover and get relief.

### World Wheat Pool Conference

Will Be Held In Regina On June 5, 6 and 7

Preliminary arrangements for the third international wheat pool conference were discussed at a meeting of the international conference committee held here in Winnipeg recently.

The conference will be held in Regina, June 5, 6 and 7, and it is expected that all the important wheat exporting countries of the world will be represented.

No statement was made concerning the preliminary plans discussed recently, but it was announced the committee would meet again in May to arrange final details.

### Alberta Cattle For U.S.

According to figures compiled by Samuel C. Reat, American Consul at Calgary, more than \$500,000 worth of cattle from Alberta were exported to the United States between April 1, 1927, and November 30th. Approximately 12,000 head of stockers, feeders and butcher cattle were shipped south, 1,449 being invoiced through Lethbridge.

Users everywhere laud its praises.

Send 10 cents for trial pkg. of tablets to Dr. Pierce's Laboratory in Bridgeman, Ontario.

### Filling Up Vacant Spaces

53,000 New Colonists Added To Canada's Population In 1927

Through C.N.R.

Approximately 53,000 new colonists were directly added to Canadian population in 1927, the latest report of the Department of Colonization and Development, Canadian Pacific Railway. Of these roughly 35,000 moved directly through channels created by the Department into agricultural or domestic service, farm training or farm ownership. Settlers moved from the United States by the Department's organizations totaled 11,000, practically all of which are established on farms.

### FOUND A HEALTH

#### BUILDING TONIC

A Nova Scotia Lady Was In An Anemic Condition

Men and women who do not sleep well, do not refresh, and strengthened by a night's rest, and generally suffering from thin, watery blood. The nerves fail to get the nutrition that the body needs, and the wearout feeling is the result. Building up the blood is the one sure step to renewed health and strength, and for this purpose nothing equals Dr. William's Pink Pills. From first dose to last, they enrich and purify the blood, and they may promote better appetites, better rest at night, and renewed strength.

Mrs. N. E. Uhlemann, Williamsburg, Nova Scotia, writes: "I have received such a benefit from Dr. William's Pink Pills, that I would feel myself disgruntled if I did not let you know."

Very poor state of health, and reached the point where I used to remain in bed. A doctor was called in, and he told me I had no organic trouble, but was simply in a low tone of nervousness. I have been left a family to support, which I did by dressmaking. The doctor said my condition was due to lack of sleep and advised a rest cure. I did not see how it was possible for me to take a very long rest, so I decided to try Dr. William's Pink Pills, and to my surprise, after taking them, I was just what I needed. I took eight boxes and again was in good health as usual again. This was a few years ago, and I am still in good health about a year ago when I broke out with humor of the blood. Again I consulted the doctor, who said I had been born so weak, so I had to take care of myself so that I could not easily poison myself. I told him I had bought several boxes of Dr. William's Pink Pills, and he told me to continue taking them. I did, and they were just what I needed. I took eight boxes and again was in good health. I can therefore recommend these pills in a weak or run-down condition."

Dr. William's Pink Pills are sold by all druggists or will be sent by mail paid postage of price, 50 cents a box. "Try them."

### Hans Firm Foundation

Sometimes viewing the progress of our next-door neighbor, Canadians have felt disengaged. They are an acceptable model to children and adults, and Canada's progress was apparently small-like. It is true that our rate of advancement has not been so rapid, but we have been building on a firm foundation and we are now in a position to reap the benefits. The next ten or fifteen years should see a development that will bring joy to the heart of every Canadian.

Miller's Worm Powder will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable model to children and adults, and Canada's progress was apparently small-like. It is true that our rate of advancement has not been so rapid, but we have been building on a firm foundation and we are now in a position to reap the benefits. The next ten or fifteen years should see a development that will bring joy to the heart of every Canadian.

Miller's Worm Powder will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable model to children and adults, and Canada's progress was apparently small-like. It is true that our rate of advancement has not been so rapid, but we have been building on a firm foundation and we are now in a position to reap the benefits. The next ten or fifteen years should see a development that will bring joy to the heart of every Canadian.

In New York City alone it is estimated that 100,000 women daily have their hair marcelled.

The most common mistake in mixing concrete is too much water per unit of cement.

When You Buy A Car, Buy A Car With A Good Record.

## ALBERTA ROAD TAKEN OVER BY CAN. PACIFIC RY.

Edmonton, Alta.—The sale of the Lacombe and Northwestern Railway to the Canadian Pacific Railway was announced by Premier Browne. After considerable negotiations, President Beatty, of the C.P.R., accepted the offer of the line and agreed to indemnify the province against future liability on outstanding five per cent bonds for \$273,700, and in addition to pay \$100,000 for the construction and construction and extension of the road to a point at or near Telfordville, the extension to be completed within three years. The length of the proposed extension is 20 miles.

This extension will be made if no part of the district is more than 10 or 14 miles from the railroad. In making the announcement, the premier stressed the fact that every effort had been made by the government to bring the railway into the province.

"Our negotiations were very strongly upon the C.P.R. that construction of the line be carried right into Edmonton, but it was found impossible to get this done at the present time."

The present terminus of the Lacombe and Northwestern Railway is at Breton, and the proposed extension will bring it to a point near Telfordville. The premier intimated that the deal with the C.P.R. means a saving of \$175,000 a year to the province.

The physical condition of the road had been assessed at \$2,100,000. John Callaghan, deputy minister of railways, Premier Browne expressed satisfaction at the conclusion of the negotiations with the C.P.R. The premier also stated that he had still not received the terms of Sir Henry Thornton for the separate purchase of the A. and G. W. Railway.

## Plans To Inaugurate Atlantic Air Service

Will Start In September Says Commander C. D. Burney

Washington—Commander C. D. Burney, a member of parliament of Great Britain, told President Coolidge that he had been invited for the inauguration in September of regular air service between London and New York in which a fleet of six gigantic lighter-than-air ships will regularly cross the Atlantic ocean.

Commander Burney, who said he was the designer of an airship as large as the steamer Mauretania and now being built in England, said that the ship would make the passage from London to New York in 38 hours and the return in 48 hours.

He said the cost of the airships will be \$400 and that a ship would leave London every other day and New York on alternative days. The company expects the ships to land in either Montreal or New York, depending on prevailing winds.

In addition to 100 passengers, the airships will be able to handle ten tons of freight or mail, Burney said.

## Wins Race With Wolf

Indian Kills Animal After Four Miles Chase Through Brush

Sault Ste. Marie, Ont.—Armed only with an axe, Angus Kopikal, 19, Indian trapper and known as a runner, chased a wolf four miles through heavy brush and won the race. Kopikal sighted the wolf while following his trap line. The chase led through swamps, thick underbrush, and over hills. Snowshoes gave the Indian an advantage offset by the heavy brush. Several times Kopikal came almost within striking distance. Finally he cornered the thoroughly beaten animal and finished it with his axe.

**Dairy Production Declines**

Calgary.—Tremendous prosperity among the farmers of Alberta, following remarkably successful seasons for grain growers, was held by Hon. George Hoadley to be partially responsible for the serious decline in dairy production which had been observed in the province last year. Mr. Hoadley was addressing the manufacturers' section of the Alberta Dairymen's Association 23rd annual convention.

**Would Outlaw Submarines**

Washington.—A demand that the submarine be outlawed as a weapon of naval warfare was made in the House Tuesday, by Representative Frothingham, of Massachusetts. He proposed that the nations of the world unite in abolishing the submarine and prohibit its construction.

## Stories Are Discredited

**Table Of Semi-Tropical Land In Northern B.C. Is Largely Fiction**

Ottawa.—The making of aerial maps is resulting in a greater influx of prospectors to Canada's many mining fields and is a time-saver for company organizers. A. H. Narraway, aerial survey engineer of the topographical survey, told the convention of Dominion land surveyors here.

Mr. Narraway declared maps being made through the use of aerial photography were actually the best and most accurate obtainable.

Talk of newly developed semi-tropical land in Northern British Columbia which was said to be kept warm through the eruption of hot springs became fiction, according to a report read to the delegates by K. P. McCusker.

Speaking of a recent survey he conducted on the northern stretches of the Pacific coast province, Mr. McCusker said he had found luxuriant meadows and prairie land and large stretches of open country which he termed "summer-land." It could not be classed as semi-tropical, however, the speaker declared. The country abounded in game, goats, sheep, caribou and grizzly bear. Grizzlies grew to such a height that it was clear no heavy snow fell during the winter.

## New Governor Installed

**James McNeill Takes Over Administration Of Irish Free State**

Dublin.—Escorted by a troop of Free State Cavalry, James McNeill, Governor of the Irish Free State, went to Leinster House where the chief justice administered the oath of office.

The cavalry escorted Mr. McNeill and his wife, who rode in a motor car over a route of three miles to the vice-regal lodge.

There was no demonstration entourage and the spectators were drenched by a heavy rain.

After the oath had been administered, General McNeill was presented to all the high Free State officials and their wives and then went to Leinster House where his first public act was to place a wreath on the cenotaph there in honor of the Irish patriots, Arthur Griffith and Michael Collins.

Timothy Healy, the retiring governor-general, had quietly vacated the vice-regal lodge overnight with his daughter, driving to his old home in Chapelizod on the banks of the Liffey.

## Building Starts At Flin Flon

**Bank Already Erected and Contract For Drug Store Let**

Flin Flon, Man.—That the much talked of Flin Flon mine promises big business in the future is proven by the fact that the Royal Bank of Canada has built a branch there. This is the first bank to be started since the taking up of the option and the bank will be followed shortly by a drug store, the contract for which has been let.

The new Flin Flon hockey team has accepted a challenge from the Northland Hockey Association for a match during dog derby week, and this will probably be arranged. A first class rink has been built on the mine and the miners are busy procuring the March date.

## Form New Federation

Winnipeg.—With 300 Indians present, the Federation of Canadians of Magyar Descent was formed at a convention here. Dr. John Ujvary, Regis, was elected president and Nicholas Istvany, Hamilton, Ont., secretary. The objects of the federation are to create citizenship organizations which would make the descendants of Magyars who came to the Dominion full-fledged Canadians, assist them in land development work and aid in philanthropic and charitable operations.

## Had Complained War History

London.—The Daily Stoic said it had been reported that the late Earl Douglas Haig had completed a history of the great war. The book was said to have contained more of the secret history of the conflict than is now available, and Paul Haig decided that it should not be published during his lifetime. It is believed that he left implicit instructions how the book about be dealt with.

## Order American School Closed

London.—The government has ordered the American school at Esmirna, Turkey, closed on the ground that it has broken Turkish law by converting students. The government recently investigated the school after it had been reported that four Moslem girl students had been converted to Christianity. The Turkish law prohibits religious propaganda in the schools.

## Other Nations Would Like Canadian Envoy

**Would Mean Admittance Of Canada To Pan-American Union**

New York.—Although members of the Canadian Government have stated that the Dominion will not take the initiative in forming a Pan-American Union, a special dispatch to the Herald Tribune from its correspondent at Havana indicates that Canada would be speedily admitted, provided she extended her diplomatic connections to several Latin American countries.

Described as "curious developments running under the surface," the dispatch says: "Unofficially a suggestion has been made to persons who are well informed to the Canadian authorities, that if the Canadian Government would send diplomatic representatives to Chile, Argentina, Brazil, and Mexico, as she has done to Washington, she would be speedily admitted to the union."

## Youthful Burglars Captured

**Two Gangs Are Founded Up By Young Police**

Winnipeg.—Two gangs of youthful burglars, members ranging in age from 14 to 19 years, and totalling 11 in number, have been rounded up by police recently. One gang devoted its efforts exclusively to stores and residences in the west end of the city, while the other gang operated over a wide area in Manitoba and Saskatchewan.

The first group of youthful bandits was captured by police during a series of investigations into a series of store robberies. The second coup was made when the youths were surprised by police while in the act of robbing a local drug store.

## MANITOBA'S NEW LIQUOR BILL IS FINALLY ADOPTED

Winnipeg.—With but brief debate, Manitoba's new liquor bill, which provides for the sale of beer by the glass in hotel parlors and clubs, and the purchase of hard liquor under a cash-and-carry system from Government controlled stores, was adopted in the Legislature.

The act probably will be proclaimed February 15, Hon. W. J. Major, Attorney-General, stated recently.

Preparations for opening beer parlors are well under way by hotel men in city and rural districts, and extensive alterations have been made by some in fitting their premises in accordance with the new act.

Under the act, provision is made for taking a local option vote in the 23 "dry" constituencies of the province.

The Manitoba Liquor Commission is given wide powers under the act and severe penalties for infractions are provided. The Government will take all liquor profits, instead of dividing them with the cities and municipalities as at present, and has the right to purchase or build a brewery if conditions warrant.

## President of Irish Free State

Wm. T. Cosgrave, head of the Irish

Free State Government, who recently paid a visit to the United States and Canada.

## Pay Tribute To Senator

**Portrait Present To Senator Desaulles To Commemorate Hundredth Birthday**

Ottawa.—The remoteness and the nearness of those stirring events which have given their color to the history of Canada were strikingly emphasized when both Houses of Parliament, having adjourned for the occasion, a portrait of Senator Georges Casmir Desaulles was presented to him by his fellow parliamentarians in memory of the 100th anniversary of his birth. Hon. Mr. Desaulles celebrated his centenary, September 29, 1927.

Hon. Howitt, Bostock, Speaker of the Senate, made the presentation in the Senate chamber.

Right Hon. W. L. Mackenzie King, Prime Minister, expressed his pride in having the honor to join with the Senate in congratulating Hon. Mr. Desaulles on the age of his centenarian and on the services given with such distinction to himself, his province, and to his country. It would be of interest to all to know that in the rebellion of 1877 Mr. Desaulles, then a boy of ten, was placed under arrest and although not imprisoned, was put under surveillance for almost a year. Senator Desaulles at present had a distinct recollection of the stirring events of those days. His mother was a sister of Louis-Joseph Papineau.

Hon. W. L. Bostock, leader of the Opposition in the House of Commons, associated himself and the Opposition with the Prime Minister's position.

**Reveals Operations Of Smugglers**

New York.—A confessor of Florian Lamott, a sailor, has revealed the operations of the diamond gang which has smuggled hundreds of thousands of dollars worth of diamonds from Europe during the past year. He confided to a leading 35 pages of diamonds into New York last November. Arrested last November, Lamott had \$100,000 in diamonds concealed in the heels and toes of his shoes.

The three largest hotels in the world are the Pennsylvania and the Commodore in New York City and the Stevens in Chicago.

## Land Surveyors In Convention At Ottawa

**Report Of Summer's Work Is Given To Government**

Ottawa.—After months spent in the uninhabited or sparsely settled sections of Canada, the Dominion land surveyors are here to compare notes, exchange experiences and to lay before the Government and the people of Canada the result of their summer's work.

When the convention opened about 100 surveyors and engineers took part. R. W. Caulley, of Edmonton, the president of the association of Dominion Land Surveyors, occupied the chair. His address was the feature of forenoon's meeting.

The unbroken area in Canada which still remains practically unexplored and unknown was emphasized by Mr. Caulley.

"No surveyor has ever set foot on the greater part of Canada," he said, "and less than one-quarter of our wonderful country has ever been adequately mapped out or can be until the surveys are made."

## Sees No Possibility Of Peace Department

**But Resolution Will Start Debate Says Miss MacPhail**

Winnipeg.—During Toronto's "most reactionary city in Canada," Miss Agnes MacPhail, M.P., speaking at the banquet of the Border Cities Business and Professional Women's Club, delivered a vigorous attack on war, its makers and planners.

Miss MacPhail said she had placed a resolution upon the order paper at Ottawa calling on the government to authorize the formation of a government department for the promotion of international peace and goodwill.

"How important peace is to us in doing all it can to promote the military spirit," Miss MacPhail said. "Why should we not have a department working to definitely promote the spirit of amity and international friendship? I know my resolution won't carry, but it makes excellent ground for debate."

## Ban On Export Liquor Houses

**Lash Is Sought As Penalty For Drug Peddlers**

Victoria.—Discussing liquor legislation in the Legislature, Attorney-General A. M. Manson said the fight begun in 1922 had now borne fruit and export liquor houses were to be prohibited during the year. In view of the circumstances, this request coming from the provinces, he did not think the Senate would venture again to reject the legislation, as had been done twice before it passed the House of Commons.

He was hopeful also, he said, that the Federal House this year would adopt the British Columbia suggestion that the lash be added to the penalties for drug peddlers.

## PRAYER BOOK REVISION IS STILL A LIVE QUESTION

**London.—The controversy here over the Church of England prayer book continues unabated.**

At a meeting of the London Diocesan Association of the Federation of Catholic Priests, an Anglican body, a resolution was passed urging the whole question of the revision of the prayer book should be postponed until after the Lambeth conference of 1930. The resolution declared the bishops of the diocese in the deposited prayer book were not likely to recommend themselves either to the Anglo-Catholics or the Evangelicals, and it pointed out there were churches in communion with the Church of England that had not yet been consulted with regard to the alterations in liturgical standards.

Lord Halifax, a leader in the Mass lines conversations, insisted on a similar measure of freedom being accorded the Church of England as is now enjoyed by the established Presbyterian Church of Scotland. He expressed the belief that if the people of the church united on this they could command success, but that otherwise they would remain powerless.

There are anxious times for the church, said the Archbishop of York, speaking at the opening of a mission exhibition at Sheffield recently. "Those who are in a position to know are aware that the decision to be reached next week in the church assembly may involve the whole course of history for the church of this land. We pray we may have the wisdom to discern God's purpose and the courage to follow it," he said.

**Canadian People Confident**

Halifax.—"I am struck by the note of confidence which Canadian people have regarding the future of this Dominion and also by the enlargement of knowledge which you have regarding Canadian resources, both agricultural and mineral," declared Rt. Hon. L. C. M. S. Amery, Secretary of State for the Dominions, in an interview at Government House, where he was entertained during his brief stay in the city.

**Urges Sales Agency**

Winnipeg.—Establishment of a national co-operative selling agency to handle the products of the various provincial organizations was advocated by C. B. Gooderham, Dominion agrarian, at the annual convention of the Manitoba Beekeepers' Association. Mr. Gooderham also urged Government standard grades for honey, and curtailment of the present price cutting and individual selling.

**Naval Men Go To England**

Winnipeg.—On their way to England, the naval men who are bringing her back to Canada, three officers and 64 petty officers and men of the Royal Canadian Navy, passed through Winnipeg recently on the Canadian National Railways.

They will sail from Halifax on the steamship Lapland. The sailors are from Esquimalt and were the crew of the "Petrel."

Enlisted men of the United States army have collected \$3,748,997 in interest on savings in the last 55 years.

## CUSTOMS PROBE INTERIM REPORTS TABLED IN HOUSE

Ottawa.—In the reports of the Royal Commission headed by Chas. Justice J. T. Brown, of Saskatchewan, which investigated the Department of Customs and Excise were tabbed in the House of Commons in sequence to the general report recently made public.

Saskatchewan ports and concerns figure rather conspicuously.

Dealing with the customs port of Regina, the commission expresses the view that it requires a thorough review.

"The inquiry impresses us with the view that the collector has not a sufficient grasp of the details of his work. We refer to the Canadian Drug Company, the Yorkton Distributors, the Prairie Drug Company, the Regina Wine and Spirits, Dominion Distributors and the Regina Vinegar Company. All of these companies appear to have conducted their business in persistent and open contravention of the laws and regulations governing excise, and even the most casual observer could not fail to detect the irregularities. These companies were well known and identified by the well-known firms, the Chechukins, the Nations, the Diamonds and the Rabinovitch, and yet they were seriously expected to carry on a bonafide "drug" and "vinegar" business. That such a condition of affairs could have existed at all, let alone have continued for several years, shows not only a lack of intelligent and efficient supervision on the part of the collector of the port but serves to demonstrate a breakdown in proper and efficient supervision on the part of the department as a whole."

"The sub-collector at Yorkton was alarmed at the situation in his port brought about by the activities of some of these companies, and although he called the attention of the collector at Regina to the difficulties and dangers with which he was faced, he seemed to give very little helpful or sympathetic consideration."

## Eminent Divine Is Dead

**Dr. W. Leslie Clay, Head Of Presbyterian Church, Dies In Winnipeg**

Winnipeg.—After an illness of two weeks, Rev. W. Leslie Clay, D.D., eminent leader of the Presbyterian Church in Canada, and pastor of St. Andrew's Church, Victoria, B.C., died in a hospital here.

Dr. Clay, who was in his 65th year, suffered a heart attack while journeying from Victoria to Ottawa to attend the opening session of Parliament. Arriving here Thursday, January 20, he was taken from the train and confined to a hospital.

Two Fliers—Air and Snow

F. Trubee Davison, assistant United States Secretary of War in charge of aviation, is having a look at "Mountie," famous husky with the Chateau Frontenac dog team, while his driver and owner, Arthur Beauvais, is answering questions. Mr. Davison is up at the Chateau Frontenac taking in the Quebec Winter sports season and Mountie is doing his bit towards making it a success. Whenever he appears in the lead of the dog team he draws all the attention. For Mountie used to lead the patrol of the Royal Canadian Mounted Police in the Far North and has earned the Victoria Cross, men say.

**Town Development**

It used to be frequently said in smaller towns, that it is the business of a good citizen to mind his own business, keep out of debt and avoid breaking laws. It was commonly thought if he did that, it was about all that could be expected of him, and he was conforming to the ideals of good citizenship.

But a community's development cannot be promoted in those times on any such limited basis. The fact that so many small town people still have this spirit, and expect to get along without doing anything particular to boost community movements, is one of the principal reasons why some towns do not get ahead faster.

Some must take hold and carry on the work of churches and fraternal societies. Some of the men with a special head for business need to work in some organization for the commercial and other needed development of the community. Some need to work in clubs for educational purposes, and for more interesting social activities. There is something that each one should do, and we must all take hold to do something in these public lines, if we expect that a town is going to keep up with the game.

People should not act as if they were making a great sacrifice if they devote a little of their time to such purposes. We should love our home town so much, we should be so anxious to see it go ahead, we should be so conscious of the gains that people who have initiative or ability or industry should be willing to give some time each week to helping forward such causes.

**Fighting Back With Similar Weapons**

The man who sees in advertising an avenue whereby he may place his store more prominently before the public will gladly spend time to prepare an announcement of interest every week, and so offset the continual effort being made by outside houses to encroach on local trade. Advertising in the local paper is the most forcible weapon with which to combat such competition, as is evidenced by the efforts of mail houses to secure advertising space in local newspapers. Twice recently has The Journal been offered advertising contracts by city houses, but the business has been declined in order that we may consistently advocate the claims of the home merchants for local business. People shop where they are invited to and where they secure good values and courteous service; and one of the prime requisites to interest them is local newspaper advertising.

**Swank Doesn't Count**

Charlie Clark, for twenty years or more publisher of the High River Times, a successful weekly newspaper, is quoted in the Lethbridge Herald in a very interesting editorial entitled "Small Town Virtue," which concludes with the following paragraph:

"Altogether through intimate daily association we discover both the best and the worst in each other. But to live amicably as most small communities do, we must tend more and more to magnify the best and minimize the worst. In no place are bluff and swank so futile. Indeed, the "bluff" that is part of the stock in trade of much of the social life of cities, is worse than useless in a small town, where everyone knows the facts. Simplicity is honored, and a man is valued according to his day to day merits."

**A Superb Dive Against Superb Scenery**

One of the most remarkable photographs ever taken in the Canadian Rockies, a work of art that blends in equal proportion beauty, grace, power, in one unique effect. The girl, a native of here where Miss Lydia Fulcher, fancy diver, is portrayed high in air poised like a hawk. Miss Lydia, the infinitesimal fraction of a second before she sinks to cleave the waters of the pool.

Learned to swim in the Canadian Government's great pool, "The Cave and Basin," at Banff when she was a mere child. She became a champion last year in the B.C. Winter Games when she dived into the Cave and Basin filled with sulphur water from Sulphur Mountain, when the temperature outside was 15 degrees below zero. She mark, while the water of the pool was well within summer temperatures.

**Shamrocks to Play  
Calgary Hollies**

Coleman Girls Defeated Banff Team and Will Play on Friday Against Holders of Championship

The speedy Coleman Shamrocks put Banff out of the running in the ladies championship series at Banff last Monday night by a score of 2-0. The visitors outlasted the Banff team in both combination and team-handling over the latter's superiors. The Banff girls fought doggedly till the last bell and did not abate their speed or let up in their efforts to score. Sophie Blaskin in goal for Banff made some real good saves and had it not been for her good work the score would have been higher. M. McDonald, in goal for Coleman, was only once or twice called upon to exert herself. Both goals were scored for Coleman by May Muir in the first period, one being unassisted and the other on a pass from Dot Johnson.

Goal summary—first period; 1, Coleman, Muir from Johnston, 6:00; Coleman, Muir. One penalty, M. Gratz.

Second period—No goals, no penalties.

Third period—No Goals. Lineup—Banff; Goal, S. Blaskin; defense, Doris Douglas, Elsie Brown; forwards, M. Gratz, M. Horner, E. Knight, M. Thompson, E. Blaskin.

Coleman—Goal, M. McDonald;

defense, M. Chalmers, M. Hallidie; forwards, May Muir, Pat Fraser, Dot Johnston, M. Bell, P. Purvis, P. Fraser.

## Famous Indian Treaty Opened New Empire for Settlement

1.—Chief Duck Head, Chief of the Blackfeet and descendant of Chief Crow Foot, of Chief Crow Foot. 2.—Site of old Chief Crow Foot's Lodge. 3.—Monument erected to memory of the grave of Chief Crow Foot. 4.—Decorating the grave of Chief Crow Foot.

Fifty years ago, or in the late summer of 1877, only a few days before the first locomotive engine entered Western Canada, the most important Indian treaty between the Canadian Government and the Indians of the plains was signed.

The treaty, known as the one that brought peace to the great plains and threw open a new empire for settlement. The historic document was signed at the site of the present town just east of Calgary and near the Canadian Pacific Railway station of Cochrane. It is, probably, a greater tribute to the moral mettle of the white brothers that the terms of the treaty has been lived up to in every detail.

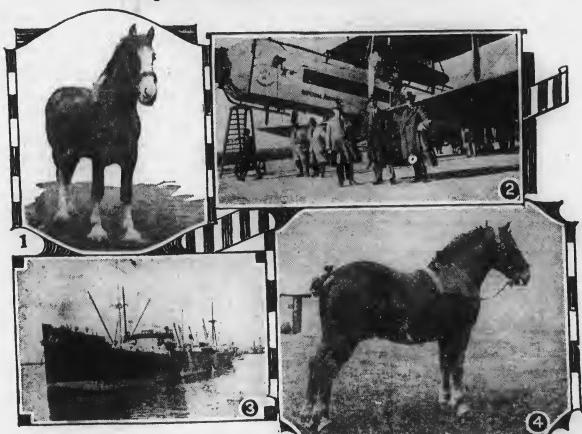

On September 22, 1927, the fiftieth anniversary of the memorable occasion, hundreds of people from all walks of life represented by delegations of various tribes of Indians and officers of the Royal Canadian Mounted Police gathered at the historic site for an impressive memorial service where a cairn and tablet had been

erected. Mrs. James F. Macleod, widow of the late Colonel Macleod, commissioner of the old Royal North West Mounted Police, unveiled the tablet. The ceremony was a success, was successful in securing the signing of the treaty 50 years ago. The earth covering the tablet is in close proximity to the grave of Chief Crow Foot, who in signing the treaty hung open the great plains for settlement, and the buffalo had been our food always. We have given you our land, Blood and Sarcos as your children, now and that you will be indulgent and charitable to them.

"The advice given me and my people has been very good. If the world had been as it is now, where would we all be now? Bad men and whiskey were killing us all, but that few indeed, as we would have been left to die. The police have protected us as the feathers of the bird protect it from the frosts of winter. They have given us all good, and trust that all our hearts are honest in goodness from this time forward. I am satisfied. I will sign the treaty."

"While I speak, be kind and patient. I have to speak for my people who are numerous, and who rely on me to follow that course which in the

## Champion Stallions of Four Countries

1.—"Lord Willingdon," \$10,000 Clydesdale, one of the best Stallions ever bred in the Old Country. 2.—W. J. McCallum, at left, about to board plane for Paris on horse-buying tour. 3.—S. C. P. R. Freighter "Bolingbroke." 4.—"Commander of Moraton," an English champion included in the shipment.

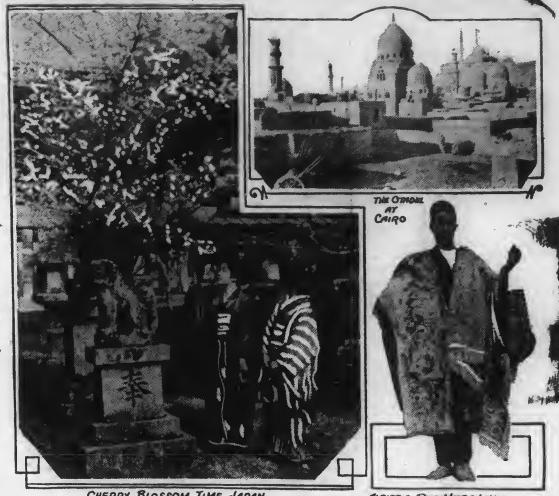

What is considered to be the finest collection of stallions ever brought to Canada arrived in Montreal recently from England and Europe on board the Canadian Pacific freighter "Bolingbroke," and the animals are owned by W. J. McCallum of Brampton, Ont., and Reginald Scott and represent the best of the champion heavy horses of England, Scotland, France and Belgium, having been purchased by Mr. McCallum for the sum of \$20,000. The motor tour of the rural areas of the British Isles and the two countries of Europe, however, was not completed until January, prior to his exhibition at the Winter Fairs held within the next few weeks at Toronto, Chicago, Detroit and Ottawa. The latest news of the value of the large shipment, can be obtained by the fact that one of the horses included in the shipment, Lord Willingdon, was purchased by Mr. McCallum for a price exceeding \$10,000. Over a quarter of a million dollars

has been invested by Mr. McCallum, his horses carry the record of championships won at practically all the fairs and exhibitions in Great Britain and Ireland, and the "Lord Willingdon," the stallion for which he paid over \$10,000, is the most valuable horse with the present exception of the ones I have ever heard overseas. He was the only two-year-old winning double championships at the Royal Show, Newport, Scotland, and champion at the Kilmarnock Show. This stallion will go to Scotland for breeding.

Questioned as to the damage done to the horses during their stay through the introduction of tractors and other mechanized farm implements to take the place of horses, Mr. McCallum said that the damage done all the damage to the horse industry possible. There was a scarcity of good horses in Canada and the British Isles, and due to the fact that the number of good horses had greatly decreased. He believes that the market for horses in the United States will go a long way towards stimulating the raising of better quality horses.

The history of a great number of

## The Psychology of Color on a World Cruise

CHERRY BLOSSOM TIME, JAPAN

ALGERIA'S RUQ MERCHANT

Colors that run rampant in the four corners that make a lasting impression on the memory of the world traveler. The colors of the world in their colorful ensemble are but a few miles apart and the keynote of their thrumming contrastuals. Today we may see the pyramids of Egypt, tomorrow the mountains of Australia, and the effect on the senses of man and of animals; and how it affects temperament and health.

Colors of the scattered parts of the world that burst from quaint bazaars and the costumes of the inhabitants on the sea and land, the sun and its sea and sky, with Mount Vesuvius on one side and the Islands of Capri, Sicily, and Malta. From afar, distance, colors in architecture, and the colors of people, peasant and paupers, gladden the eye, and make the blood run riot in us.

From New York on December 2 the Canadian Pacific steamship Empress

of Australia, will commence another cruise to the contrasting ports of the world. This vessel will make an entire circuit of the globe anchoring in 66 ports and calling 21 different countries, covering distances of 24,000 miles.

Portuguese Capital of Madeira,

and the first port of call is radiant

with gaily colored houses and gardens;

Costumes here are likewise brilliant;

the women are dressed in their

sea and sky, with Mount Vesuvius

on one side and the Islands of Capri,

Sicily, and Malta. From afar, distance,

colors in architecture, and the

colors run riot. The bazaars, the

palaces, and bright bazaars magnificence with their numerous minarets and domes are color schemes of rare beauty. Each of the countries offers something new and strange and strike vividly into the memory, causing the traveller to become interested consciously or not, in color psychology.

One of the features of the world

cruise of the Empress of Australia, is

the variety of colors that have been

taken out of the hands of the members

of the cruise party. From start to

finish the ship is their home. Worries

of money, care, worry, anxiety, worry,

concern, uneasiness, regulations and language are

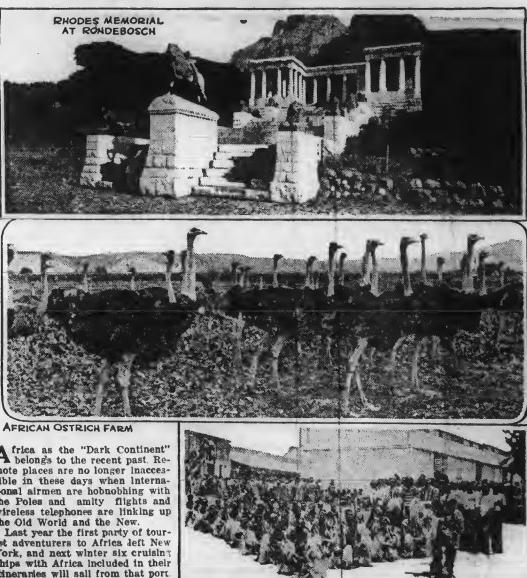

a thing unknown to the passengers,

as these details have been worked out

months ahead and handled entirely

by the cruise managers on board.

## Throwing a Lot of Light on a Dark Continent

AFRICAN OSTRICH FARM

Africa as the "Dark Continent" belongs to the past. Remoteness and savagery are no longer conceivable in these days when international airmen are hobnobbing with the Poles and ants, flights and flights of pigeons are linking up the Old World and the New.

Last year the first party of tourists to Africa left by York, and this year six cruise ships with Africa included in their itineraries will sail from that port. The Canadian Pacific Steamship Company of France will leave this month for her scheduled South American-South African cruise, touching the West Indies en passant.

While Canadians were settling

Canada, the South Africans were fighting the Boers, and after the Boer's grave in the Matapelo Hills will recall his magnificent daring

in making peace with the Matapelo Indians, and the manner in which he

held in these same hills.

Victoria Falls will also be visited

and one of the most striking sights that abounds in "the sun that thunders" of the native name or the Arabic which means "the end of the world." America's gold

rush of '98 has its counterpart in

the diamonds on the African white

mines, but the diamond rush to the Kimberley mines in 1870 is unique.

The first discovery was made by a prospector who picked up a piece of colored stone a child had been playing with. The assay proved

that a spectacular diamond was

in the stone, and the miners soon

held the whole world visions

"diamonds" in glittering heaps. In

barely forty years these mines

have yielded \$1,000,000,000 worth

of these gems. Think of the joy of

seeing rough diamonds come out of

the earth and being able to buy them. This is a pleasure in store

for the new winter's adventurers to Africa.

Ostrich feather farms are one of the oddities of Africa destined to

thrive in the heart of even the feminine

and wretchedest of Africa. Paris fashions are sent out by parcel post to Johannesburg and reach there before they come to Canada. However, there are still

plenty of natives in their national garb, and talking drums and Zulu dances are still to be seen in the streets.

In fact, the war dances are a Sunday morning institution in the kraals at the mines and are encouraged by the owners as an antidote to labor troubles.

## WORLD HAPPENINGS BRIEFLY TOLD

A contract for construction of a grain elevator has been let by the New Westminster Harbor Commission. The cost of the elevator will be about \$300,000.

The establishment of a department for the promotion of peace and international understanding is advocated by Miss Agnes MacPhail, Progressive, Southeast Grey.

Hon. C. A. Dunning, Minister of Railways, has issued in the House a bill to provide for the construction of a line of railway between Rosedale and Bullock, Alberta.

Patrick Murphy, aged 44, was added to the list of victims in Winnipeg when he was found dead in a bed in a rooming house, as the result of drinking weak alcohol. He is the 12th victim within the past two months.

Sir Robert Borden was chosen president of the National Council of Canada, Institute of International Affairs, at the first annual meeting held in Ottawa. John W. Dafe, Winnipeg, was elected vice-president.

Professor Johannes Fibiger, winner of the Nobel Prize for medicine in 1926, died recently at Copenhagen. Professor Fibiger was on the faculty of the University of Copenhagen and was awarded the prize for his work in cancer research.

The scope of treaties arrived at by the Pan-American conference has been widened to include the world instead of the U.S. and two Latin-American republics. The treaties involved are those dealing with commercial aviation.

Admirers of many nationalities attended the funeral of Vicente Blasco Ibanez, Spanish author, who died at Mentone, France, in voluntary exile. A company of Alpine chasseurs—the famous blue devils—rendered military honors.

### Krupps Are Kept Busy

Makers Of War Material Find Profit In Peace Time Products

In shifting from the manufacture of cannon and war materials to the making of such peaceful articles as false teeth, teapots, locomotives and motor cars, the Krupp Works, at Essen, have made a paying change.

The annual Krupp report shows a net profit of \$12,000,000 marks—about \$3,100,000—compared with a deficit of 1926 of 2,000,000 marks.

The Krupp Works, so recently famous throughout the world as purveyors of war, are now keyed for the production of exports in tremendous quantity, have accomplished readjustment to peaceful productivity with extraordinary rapidity.

Almost the same day and night activity prevails as in days before the world War, but today the works are filling orders for railway locomotives, cars and parts for motor cars, harvesters, razors, knives and forks, cash registers, artificial teeth mounted on a platinum-like steel alloy and a hundred and one other such commodities as peace-time worth.

### Special Kinds Of Bricks

Sand-line bricks, cinder blocks, and cement blocks are made at many points in Canada, both in competition with ordinary clay bricks and pressed bricks, and also for use in localities where ordinary bricks are not available except at relatively high cost.

Some scientists think that the rings around the planet Saturn are composed of large masses of dust particles.

A false friend and your shadow attend only when the sun shines.

### Sore Back.

Drive away the pain by in-  
sage with MINARD'S.

W. N. U. 1719

### Britain Is Following Disarmament Plan

Have Decided To Abandon 10,000 Ton  
Vessels For the Present

The British Government has announced at London, has decided to go still further in its policy of naval disarmament indicated after the failure of the tripartite conferences.

The building program passed in 1925 provides for the laying down of one 10,000-ton cruiser and two 8,000-ton cruisers in each of the three years, 1927, 1928 and 1929. The First Lord of the Admiralty, Right Hon. W. C. Pirrie, has now decided that it had been decided to abandon all the 10,000-ton vessels for the present and that one of the projected 8,000-ton ships might be carried over until 1928-29. It has been determined to abandon the latter vessel altogether.

The net result is that in the two years in question only three 8,000-ton vessels will be laid down, instead of four. In this class, however, with the elimination of the 10,000-ton ships, this will mean the saving of about \$5,000,000 (\$27,500,000). "It is understood that the program for destroyers and submarines will remain unchanged and that six submarines will be included in next year's program.

The Jacket Bolero

An outstanding new women's fashion for winter wear. The separate plaid skirt is attached to an under-blouse and the blouse is in one piece. The separate bolero jacket has pieced shoulder panels and contrasting printed velvet on cuffs and waist. In using the reverse side with the trousers surface for trimming, false pockets and cuffs with contrasting ribbons. The design No. 1704 is in sizes 16, 38, 38, 40 and 42 inches bust. Size 36 requires 4½ yards 36-inch, or 3½ yards 54-inch material, 1½ yards binding, 1½ yard 36-inch contrasting. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Extending Hudson Power

During the year 1927 hydro-power equipment was installed in Canada ready for operation to the extent of more than 221,000 h.p. In addition other undertakings were advanced to such a stage that a further total of 373,000 h.p. will be in place during the first six or seven months of 1928, thus bringing the total by the middle of the year to more than 5,100,000 h.p.

To draw more tourists to Japan the railway department is constructing a large moving picture studio.

Approximately twenty-five million students are enrolled in the public schools of the United States

### For Canadian Schools

The National Diamond Jubilee Committee is presenting the plaque illustrated above to the schools of Canada to commemorate the sixtieth Anniversary of Confederation. It is made of highly burnished copper, and is mounted on a mahogany frame.

### New Western Radio Stations

Will Experiment With Transmission  
Of Pictures

A radio station, to be established, will be erected this year just within the eastern boundaries of Saskatchewan; it is announced by D. P. R. Coats, Moose Jaw. The station, Mr. Coats said, will be erected by a commercial company but aside from the regular concert features experiments will be conducted in transmission of radio pictures. He believes television, by which the listener will be able to see as well as hear radio artists, will follow closely on the perfection of picture reception.

The Saskatchewan site, Mr. Coats explained, had been selected to overcome interference encountered by stations adjacent to cities.

### Will Do Novel Experiment

Fort Albert, B.C., Plans To Try Out  
Operation Of Municipal Coal  
Mine

A novel experiment in civic enterprise may be tried out at Port Alberni, B.C. soon if plans for the operation of a municipal coal mine materialize.

It is believed that a large bed of coal lies under the city and the proposal has been made to diamond drill the property and ascertain the feasibility of the mine project. Should the diamond drilling show that the coal bed is at sufficient depth, then the project could be operated at a profit by the city, it is believed. If the drilling shows the coal is at too great a depth to be worked on a small scale, negotiations will be entered into with a private company.

### Canada's Winter Carnivals

February Is The Month Of Sport  
Carnivals In Canada

In Canada, February is pre-eminently the month of sport carnivals. Winter sport activities throughout the Dominion have reached their climax at this period of the season and competitions to decide the supremacy in practically every line of recreation are held during this month. Skating, snowshoeing, cross-country running, curling, hockey, and other forms of outdoor recreation which have been in full swing since November or December are at their height and both novices and the more experienced have reached such a state of proficiency that the carnival becomes a most fascinating and thrilling spectacle.

### Artificial Graphite

Artificial graphite, an electric furnace product, is made near Niagara Falls, Ontario.

### Attracted Auto Tourists

Nearly 8,000 Travelled Over Cariboo  
Highway Last Year

Nearly 8,000 automobiles traversed the Cariboo highway during the 1927 season, according to records of the Automobile Club of British Columbia. The highway was open to general tourist traffic for the first time last fall.

The Cariboo highway follows the Fraser River into the historic gold country of Central British Columbia, and the lure of this romantic territory is expected to act as a mecca for many more thousands of tourists this year, both from Canada and the United States.

William Shakespeare was christened April 2, 1564, in the Warwickshire village of Englefield.

### Fort Churchill Harbor

Fort Churchill Harbor, on Hudson Bay, which has been selected by Canadian federal experts as the terminal of the Hudson Bay Railway, almost completely landscaped, will when completed, be one of the world's finest harbors. The natural breakwater and its protection to Churchill Harbor are shown by the photographs. Churchill Harbor is the natural destination of the "Company of Gentlemen Adventurers Trading Into Hudson Bay."

### SUNDAY SCHOOL LESSON

FEBRUARY 12

#### JESUS PICTURES THE KINGDOM OF GOD

Golden Text: "Thy Kingdom come. Thy will be done as in heaven, on earth." Matthew 6:10.  
Lesson: Mark 1:14, 15; 4:1-34.  
Devotional Reading: Psalm 145:7-13.

#### Explanation and Comments

I. The Growth Of the Church Of God Is Sure: It Depends Upon God, verse 26-29. A definition of the phrase, the Kingdom of God, can only be gained by studying the New Testament in which Jesus used it. In His parables we learn that it has to do with man's spiritual natures and possibilities. His message is, We might as well as we can, bring the Kingdom of God into the hearts of men: "The Kingdom of God is within you," said Jesus.

The Kingdom Of God Is Ancient: In the Kingdom of God is an ancient Syrian fragment the familiar words of Luke 1:33 read, "And to His Kingdom there will be no end; it is for the welfare of every creature." There is no chronology in the Kingdom of God; it is both present and future. As Alexander Macmillan writes, "The Kingdom of God is not something which is to come; it is here, it is now; it is complete realization in a heaven from whence it comes and to which, like its King, it belongs even though it is not yet realized. The influence of the Kingdom of God is upon us all; it is here to fight the good fight; in the heavenly presence they have gained their crown."

A parable is a story told for the purpose of illustrating a truth. The parable of "The Good Samaritan" is one of the best known. "The Bar, the Full Corn," is also sometimes called, portrays the slow but sure growth of the Kingdom of God in the world. "The Kingdom of God is not far off; it is near you." Jesus begins his parable, That is, what you see to be God's Kingdom is near you. The Kingdom of God is not far off; it is near you. It is the mother of all wisdom in the natural realm. So it is the Kingdom of God, if man should cast east upon the earth (as did Jesus and the Apostles and His later followers); it is the word of God in men's hearts; and should sleep and rise night and day, that is, lead his customary life, leading the quiet life of a saint, and the seed should spring up and grow, he knoweth not how. "The Kingdom of God cometh not with observation." Jesus told the Pharisees,

#### Recipes For This Week

(By Betty Barclay)

**LEMONGRASS JUNKET BAVARIAN**  
1 eggshell junket; 1/2 cup powdered sugar; 1/2 cup chopped walnuts; 1/4 cup almond extract; 1 pint milk; 1/2 pint cream; Marshmallows; Tart jelly or cherries.

Cut marshmallows in quarters with scissors and place in bottom of dessert glasses. Whip cream, almond extract and sugar together until stiff, add chopped walnuts. Warm milk slightly in separate dish, dissolve in it the junket powder, quickly pour this into the cream mixture, stir a moment carefully. Pour at once into the glasses. The nuts and marshmallows will rise to the top. Let set until firm. Then chill. Top with bits of tart jelly.

#### Scalloped Ham and Potatoes

Into a well-buttered pan put slices of raw peeled potatoes and a little pepper. Then a layer of uncooked sliced ham. Add another layer of potatoes and ham and pour on thin cream sauce (1 tablespoon flour, 1 tablespoon butter, to 1 cup milk). Sprinkle bread crumbs on top and bake in a moderate oven until brown and potatoes are well done. Serve hot. Just enough ham can be used to give the desired flavor, which has the advantage of adding a little ham go to the party. For parties this can be baked in a heavy tin dish with a cover and reheated over hot water on a camp fire.

#### Breaks the Spell

The male members of a certain tribe in India sometimes contract marriage with a tree. When a husband has lost two wives by death and wishes to marry a third he naturally fears that she too may die. So before the marriage he is led up to a healthy-looking tree and with it goes through the full marriage ceremony. The tree is then cut down and mourned over, says "Tit-Bits." The way this is cleared for his marriage with the new wife and she is considered free from all evil influences.

#### Tea-pot Of High Quality

Canadian tea-pot enjoys a well-merited reputation in the economic industries, being of high grade and of uniform potash content, analysis of samples from a number of quarries showing a potash content of about 12 per cent.

Increase in life insurance seems to keep pace with larger sale of motor cars. You can't fool the pedestrian.

A woman doesn't like to be flattened because she thinks she needs it.

### Cuts-Burns

Vicks' healing, antiseptic ingredients bring soothing relief. Apply gently.

**VICKS  
VAPORUB**  
Over 21 Million Jars Used Yearly

### WHAT MAKES A NEWSPAPER

Cannot Be Successfully Run Without Help Of People

A mistaken idea with some people is that the newspaper is an individual proposition. If they don't like the editor, they feel they must knock the paper and stand in the way of its success whenever possible. They do as much as a part of the newspaper as the schools, churches or anything else. The newspaper is different from any other business, it is a community affair. It exists to serve the people and not for any selfish object.

You may not like the editor and the editor may not love you any too well—but the paper is responsible for does just as much for you as the service renders others. There is nothing personal with it; it is here for a purpose and that purpose is to do what good it can in every way that it undertakes to serve the better service it can render. It takes the people to make a good newspaper and without the help of the people no one can run a successful newspaper. It requires money to operate any kind of business—even the churches and the papers are no exception and for this reason they must have the financial support of the business interest as well as the good will.

Few newspaper publishers make more than a comfortable living and scarcely one can be said to be wealthy. They deserve to be trusted and to be understood by the people—it is the editor and not the plant that makes a newspaper useful in a community, though a liberal patronage is necessary if the paper is to be a credit to the town.

### Receives Handsome Gift

Self-Made Millionaire Gives Year Income To University Of California

P. Giannini, born 47 years ago in a humble rooming house in San Jose, Calif., of poor Italian parents, has placed his \$227 income, \$1,500,000, at disposal of the University of California.

Under the terms of the gift \$1,000,000 goes towards the establishment of the Giannini foundation of agricultural economics and \$500,000 will be used for the erection of a building on the university campus in Berkeley, dedicated to ways and means of reviving and improving the economic condition of farmers, dairy and livestock men and fruit growers in California.

#### Cannot Make Public Speeches

Not generally known that the financial Secretary of the Free Church of Scotland is unable to make public speeches. He is responsible for the preparation of a great part of the budget, and is therefore condemned to silence. This tradition prevents the public from hearing the present Secretary, Mr. A. Samuel—an able speaker and a successful business man.

**Exhausted From Asthma.** Many of these rheumatic cases are due to the disease of the heart and strengthen, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which need stop the disease. Dr. D. Kalberg's Anti-Asthma is a wonderful check to this annoying ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

A scientist says that the next war will be fought with insects. He seems to be under the impression that war is a picnic.

Cork was first used for bottle stoppers between 1680 and 1715 by a monk of the Abbey of Hautvillers, France.

Nellie Grant, daughter of President Grant, married Captain Sartoris in the White house in 1874.

#### for Coughs And Colds

#### A Pleasant Slip-Instant Relief

There is an effective way to please the throat and lungs. Buckley's Mixture is delightful in flavor. It acts like a balsam in clearing the throat and lungs. One dose cures coughing and there are 49 doses contained in each bottle. It can be taken in a single dose or split up under a money-back guarantee.

W. E. Buckley, Lincoln, Neb.  
1000 bottles  
**BUCKLEY'S**  
MIXTURE  
Acts like a balsam.  
A single dip proves it.

### Cuticura Heals Irritating Rashes

Don't suffer with rashes, eczema or irritations when Cuticura Soap and Ointment are quickly applied. Eczema with Cuticura Soap and hot water, dry and anoint with Cuticura Ointment. Nothing quicker or safer than Cuticura Soap and Ointment for all skin troubles.

Bonney Book Free by Mail. Address: Canadian Dept., Bonney Book Co., New York. Price, Soap \$1.00, Ointment \$1.50 each. Value \$2.50. Cuticura Shaving Stick, 25c.

### PAINTED FIRES

BY NELLIE L. MCCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER XVIII.—Continued

They were in the kitchen. Mrs. McMann peeling a tub of potatoes for the evening supper, and Helm peeling clothes for the next day's ironing. The little lifted her dreamy eyes from the market of thoughts. "Ain't you glad you're married?" she said, "all full of nice smells of good air and sun. I like clean clothes like flowers."

Mrs. McMann regarded her with a puzzled look. "Sometimes I wonder about you, Helm," she said kindly, "you seem so queer, and hardly all there. You don't seem to hear what people are saying to you—with your dreamy looks and the queer things you say."

"Were you speaking to me, Mrs. McMann?" Helm asked politely. "I am sorry if I did not answer right. What was it you wanted me to tell you?"

Though outwardly pleased to have Helm back again, Mrs. McMann's anger burned against the girl because of the fervent expression of joy her return brought from the men. Devout thanksgiving was expressed the first day she was there to wait on the table.

"Helm at the helu again!" one little old crone cried out. "Don't leave us, Helm! we wish you son! Don't let us even if you did get married; we're willing to forgive you anything but desertion. "Gosh, I'm glad to see you," said the time-keeper, a man who seldom spoke.

"See here!" Mrs. McMann broke in, "what's the matter with the old all? Didn't I feed you?—Durn you! Didn't I sing grub here every day and hire a Chinaman to cook?"

"It's just we're glad to see her back—she's a pretty, young thing, and we like to look at her. Mrs. McMann," said the mince boss, whose special duty it was to keep peace. His wife had gone East and he was taking his meals at the boardroom table. "The boy's been here, and he's got to you."

Mrs. McMann's eyes narrowed. Helm's agile movements, her boyishly slim figure, her perfectly rounded face, and the brilliancy of her coloring, gave her the same shock of bitterness the old actress feels when her theatre shakes with applause for the new star. Mrs. McMann, in her young days had "quenched" in many a camp, where the youngest woman always travels next the pole. Now, by contrast with Helm, she was merely a grindy-gray, stout old woman, withered and battered by time, in the sight of men—and she knew it, and with the

### YOUNG WOMEN SUFFER MOST

These Two Found Relief by  
Taking Lydia E. Pinkham's  
Vegetable Compound

Ayer's Cliff, Quebec.—"I have been teaching for three years and during that time I have suffered a great deal. Every year I always feel tired and have no appetite. I was ill for a full six months last month, too, having pain in my back until I was compelled to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me to help me feel better. It helped good. It was so good I thought I would repeat the dose. And it did. Now I take six bottles every day and recommend it to others."—Dameuse FANTOUX, Ayer's Cliff, Quebec.

#### unable to Work?

Canning, Nova Scotia.—"I had irregular periods and great suffering at those times, the pain causing vomiting and fainting. I was unable to go to school and often for some hours I would be unable to attend to my work. I used to read the papers I know of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the trouble and pain greatly relieved."

LAWRENCE J. EATON, Canning, King's County, Nova Scotia. 4

W. N. U. 1719

forever gone, could be very sweet, and to see the happiness of other people. Now, when Helm, Jack, and I, that happy over those two kids it seems like it brings all back to me. It was springtime when Martha and we went off and surprised everyone. Springtime in old Ontario, when daffy little lambs were springing up and down on their crooked little legs, and the air was full of that blue haze that trails on the trees like fog; and the frogs in the ponds were saying Is the story true yet? You know the story, don't you? Mrs. McMann said, "How the frogs was caused to go in for one day to the pond, and promised they would sure get out tomorrow?"

"Oh shut up, Sim, and eat your supper—I can't be bothered to listen to you."

Helm looked up quickly. "I like Sim's talk," she said, "he says good words."

"He's just an old plaster, Helm, and would rather talk than eat if he could. He's not a good man. He's like the cold-bent old house—the engine always had to stop when the whistle blew—that's him."

"But I like it," Helm said again. "He talks kind. Tell me about the frogs, Sim."

"Some day I'll come to see you, an' I'll tell you, Helm." Sim spoke with dignity now. He had been assaulted professionally and could not recover all at once.

"He's trying to burn a meal, Helm," said Mrs. McMann brutally: "I'll bet he's not frettin'." By gosh!

"Come on Sunday for dinner with me, Sim, and then you can tell me."

Sim nodded gratefully.

"It is the long black nights, Helm, black without a star, silent, empty, not a voice, not even a dog-bark. I have been a night-watcher for ten years—no wonder I have a crav'n for voices and friends. Yes, I will come, Helm, and thank you for being so kind."

Helm's heart grew tenfold, as she thought of the long dark night, stark, silent; for although she had been only two weeks alone, she knew that loneliness and fear a night can hold when one lies open-eyed, staring into the black, unwhispering depth, wondering, wondering. One can imagine such terrible things of lost men in trackless wildernesses. And Christ—man seen far away!

(To Be Continued.)

Helm shuddered.

Alberta's Coal Production

Coal production in Alberta last year was the largest ever, reaching a total for all grades of \$6,938,755 tons.

Figures compiled by the mines branch show that 1927 went 27,832 tons ahead of the previous year, 1926, thus establishing a record.

Life's current coin is made of plain common sense.

The BABY

Why so many, many babies of today escape all the little fruitful spells and infantile ailments that used to worry mothers through the day, and keep them up 'till the night, when you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the stomach, so that the tummy seems to feel all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, constipation, or diarrhea. Or when you are sick with colds, but don't know what is the matter. For real sickness, call the doctor always. At other times, a few drops of Fletcher's Castoria will do the trick.

The doctor often tells you to do just that; and always says Fletcher's

Castoria is as free from dangerous drugs, as why experiment? Besides,

the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold!

Mrs. McMann, testily.

"I like it, Mrs. McMann," said Sim, gently, "beautiful—never out of work—always a place for old Sim. I've had to rough it a little sometimes—eatin' on queer critters here and there—that's the worst; but even at that I manage. I do not mind like some people; memory, my dear Mrs. McMann, of dear, dead days, though

### HOW WALKING COYOTE SAVED THE BUFFALO

Indians With Picturesque Cognomen Furnished Nucleus Of  
Wainwright Herd

Left to themselves, although they had been exterminated the buffalo. When the white men took a hand they went all it enthusiasm, hammer and tongs, so to speak. It is said that they even shot the poor animals from the windows of railway trains. This may be a tall story, for railways were not numerous in Western Canada for many days, but, at any rate, fifty years ago, the buffalo herds had dwindled so rapidly that it began to seem as if good citizens of the future would never have the native animal in so many heroic pose than making his last stand among the mohawks. But the day came when the white men realized that it might be a fine thing to have a few live bison on hand.

Only enough, when the Dominion Government came to the rescue, up a herd. It had to go to the United States for it. Older still, the animals it bought from a Montana rancher had originally come from Canada and were now only coming back home.

And the oddest part of the whole story was that the buffalo was saved by an Indian who had no idea that he was to be the founder of the largest herd in the world, that which today tramps the acres of Wainwright Park, Canada's vast bison sanctuary in the Canadian National Railway lines, east of Towns.

The Indian who saved the buffalo for posterity was a chap named Walking Coyote, a Pend d'Oreille, who came up to Canada on a hunting expedition in 1915 and lived with his squaw among the Piegans. When he went home in the spring he took with him four buffalo calves. Ten years later, when his herd had increased to thirteen and was eating him out of house and home, he sought a buyer.

C. A. Allard, and his partner Michael Peck, of the town of Medicine Hat, could neither buy him, nor could they manage to ransom a sum of \$20,000 before he died, were in the market for buffalo and it was they who bought Walking Coyote's collection.

Canada bought the buffalo in 1907. Rounding them up was no easy task, for the animals had been roaming wild for years, but the aid of the most experienced cowboys and the fastest horses in Montana, he managed to get them together after three seasons of extraordinarily difficult work. At the beginning, the Wainwright herd numbered approximately 160. In sixteen years it had increased to 12,000. In fact, so unwieldy did it become that the Dominion Government found it necessary to transfer some of the animals to Wood Buffalo Park or the North West Territories, north of the Peace River. The experiments have proved highly successful. Periodical sacrifices have become exigent, too, and that is why old-timers of the west and governors of the east have been able to taste—once again for the old-timers, and for the first time as far as many of the others were concerned—buffalo steaks and pemmican. That is why Wainwright policemen wear buffalo-skin coats in the winter now, instead of coonskins.

This fellowship is a mark of commendation to those women who have done much in the past to further the interests of science by their untiring energy and their never-failing patience, which seem to surmount the greatest of difficulties. Times have changed according to those who have made a study of the situation, since the days when Marie Curie began her work on radium, in which she made contributions to science, which are outstanding even in this age of progress and enlightenment.

## You May Have NORMAL VISION

But it is Very Unlikely!

Scarcely any person in these days of much reading and other forms of near eye work but would be better for the help that glasses give.

The use of the eye strain glasses will relieve tension and glasses but the exact ones will do. We can fit you with them.

Registered Optometrist

## Personal and Local

The Rev. Mr. Currie this week attended the quarterly conference of the executive committee and rural deans of the Diocese of Calgary.

Mrs. H. J. Bevan is in Lethbridge this week attending the annual meeting of the Women's Missionary Society of the United Church of Canada.

The Ladies Auxiliary of St. Paul's United church will hold a St. Valentine tea and parcel sale on Tuesday, Feb. 14 from 3-6 p.m. Everybody welcome.

The Masons of Summit Lodge will be at home to Masons, their wives, members of the Eastern Star and their families on Thursday, Feb. 16, at 8 p.m., in the Masonic hall. Cards and dancing.

Hubert Wilton Clark, of the Canadian Bank of Commerce staff, Warner, Alta., is here spending a three weeks vacation with his parents, Mr. and Mrs. H. W. Clark.

The members of Coleman Women's Institute will be the hosts at a bridge party in the K. of P. hall on Friday evening, for which invitations have been sent out.

Those poor horses trying to scratch a living on the hillsides create feelings of pity and indignation. They should either be rounded up and destroyed or the owners compelled to provide for them.

Miss McLuhan of Winnipeg who is giving a dramatic recital in the United church on Monday evening, will contribute to the evening service on Sunday, Feb. 12. This should not be missed.

All members of the Coleman B. P. O. Elks No. 117, who wish to attend the joint installation at Blairmore on Tuesday, Feb. 14, will please meet at the Grand Union hotel at 7.30 p.m., where transportation has been provided.

Salesmanship and advertising go hand in hand—the two together make an excellent team. Combined with good values and efficient service, a business is bound to prosper.

The following is from the Ana cortes, Wash. Mercury.

The Luvera grocery store will no longer be known as Paul's or Luvera's but will hereafter be known as Luvera and Company. The company, who arrived yesterday

and expects to retain membership

in the firm for a long time, is a lit

tle daughter, who has been named

Phyllis Marie for the grandmothers.

Paul has been busy today passing

out cigars and boxes of candy and

accepting congratulations, but ex

pects to get back to earth the latter

part of the week.

Polling hours on Monday are 10 a.m. to 7 p.m.

Though still in the hospital at Edmonton, Mrs. Snodad is making steady progress, and Mr. Snodad expects to go to Edmonton next week to bring her home to Coleman.

"East Side West Side," the picture shown at the Palace last Saturday evening was enjoyed by a capacity house. An equally good picture is promised for this weekend, entitled "7th Heaven."

The drawing for the clock on which tickets were given during the sale drive in December by G. R. Powell, jeweller, took place yesterday afternoon, and the holder of the lucky ticket was Mr. David Hoyle, principal of Coleman schools.

Winners at the Rehekah whisky drive on Saturday were M. S. Nash and Mrs. Higginbotham, and for the gents M. Gillespie. The floating prizes were won by Mrs. W. Vincent and Neil McKinnon.

Miss Catherine Davidson entered a number of her girl friends on Wednesday evening. Gladys Higginbotham won the first prize, Grace McKinnon second and Emily Greenhalgh carried away the consolation.

The condition of Dick Shone, who has been in the hospital in a serious condition suffering from blood poisoning, is about the same, and though at one time it was thought it would be necessary to amputate the hand, it is probable it will be saved.

On Saturday, Feb. 11, the great super-special picture entitled "7th Heaven" will be presented at the Palace, with Charles Farrell and Janet Gaynor, playing the leading parts. It is announced as one of the loveliest and most touching dramas ever screened.

A recent issue of a Winnipeg daily carried a cartoon depicting a conversation being carried on by long distance telephone between a Mr. Dudley, of London, Eng., and William Walton, long distance chief of the Manitoba telephone system. It is of interest to note that Mr. Walton is an old school chum of Councillor George Pattinson.

Mr. Alex Muir returned last Friday morning from Vancouver, to where he had accompanied Mr. D. Davidson, and states that in the short time he has been there the latter shows quite marked improvement in his health. Blyth Davidson is staying with his father for the present, and both will return at a later date.

J. Haining, for several years

hostelman at the International mine has resigned and it is probable he will take up residence in Calgary. As a photographer of local scenery, Mr. Haining achieved distinction, several of his pictures having been exhibited in important exhibitions, in the United States and Canada.

After 22 years residence in Coleman, Mr. and Mrs. J. O. C. McDonald are planning on leaving for Brule, Alta. During their residence in Coleman, which they have seen grow from a small hamlet to its present size, they have both taken an active part in local affairs.

Mr. McDonald having been a councillor for several years in the early history of the town, and for 16 years was a school trustee, while Mrs. McDonald has been prominent in various ladies organizations and the Eastern Star chapter.

A host of friends regret their departure from Coleman, and will join in wishing them success in their new home. Mr. McDonald will leave about March 1, and Mrs. McDonald will follow later.

W. Roughead's rink won the McGillivray cup in the curling competition.

Fire destroyed three houses on the Blairmore road on Tuesday morning, and an inquiry is to be held to determine the cause of the outbreak.

After the regular meeting of the W.O.M.L., Coleman Chapter No. 919, a very enjoyable social evening was spent. Thanks are due Legionare M.E. Thomas for the splendid program provided, as follows: Songs by Mrs. Asbridge, Mrs. Ramay, Mrs. Cousins, Miss Knowles and Mr. A. McCulloch; recitations by Miss Evelyn and Eddie Price; selections by Messrs. Janostak, Blecka and Morris; violin selections by Messrs. Gentile and Dominic. Mr. T. Johnson addressed the meeting in his usual pleasant manner, after which supper was served. Dancing followed, Mrs. Asbridge being pianist for the orchestra. Everyone declared it a great success.

### Kindness Appreciated

Mrs. Geo. Snodad asks that thanks be expressed to all who sent flowers to Mrs. Snodad while in the hospital at Edmonton, and also for the many kind enquiries during Mrs. Snodad's illness.

Mrs. H. E. Gate was a business visitor to Calgary this week, returning this morning.

Mrs. Whiteside entertained a number of ladies at her home on Wednesday afternoon.
